

Client Workflow Guide

Complete End-to-End Process — Step 1 to Step 15
(Ascending → Descending Flow)

This document explains how to use the DMS software from initial master setup through final settlement and reporting. Follow the steps in order from top to bottom.

Table of Contents

- 1. Organization Structure & User Roles
- 2. Complete Flow Overview (Step 1 → Step 15)
- 3. Entity Relationship Map
- 4. Detailed Step-by-Step Workflow
- 5. Dashboard & Live Screen Walkthrough
- 6. Module Screen Reference (Menu Paths)
- 7. Demo Login Credentials

1. Organization Structure & User Roles

The DMS follows a hierarchical role structure. Each role sees only the modules relevant to their work.

Role	Responsibility	Modules Access
Owner	Business overview & decision making	Dashboard, Reports (read-only)
Super Admin	Full system configuration	All modules
Sales Manager	Team supervision, order approval	Orders, Customers, Reports, Sales
Salesperson	Field order booking	Order Booking, Pending Orders
Warehouse	Stock & purchase management	Inventory, Purchases, Load Sheets
Finance	Billing, payments, settlement	Invoices, Payments, Reconciliation, Settlement
Driver	Transport & delivery support	Load Sheets, Deliveries
Delivery Person	Last-mile delivery & collection	Deliveries, Collection Entry

2. Complete Flow Overview (Step 1 → Step 15)

Direction: Start at Step 1 (top) and proceed downward to Step 15 (bottom). Each step depends on the previous one.

Step	Stage	What Happens	Performed By
1	Master Setup	Customer Types, Areas, Routes, UOMs, Products, Price Master, Customers, Vehicles, Drivers, Delivery Persons	Super Admin
2	Price Assignment	Map Customer Type → Price Master (Retail / Wholesale / Company / Bulk rates per UOM)	Super Admin / Sales Manager
3	Purchase Entry	Record incoming stock from supplier; stock levels auto-update	Warehouse
4	Stock Availability	Verify real-time stock before accepting orders	Warehouse / Salesperson
5	Order Booking	Salesperson selects Customer → Products → Qty → UOM; price auto-applied	Salesperson
6	Pending Orders	Review all pending orders; filter by Customer, Date, Area, Salesperson	Sales Manager
7	Order Approval	Manager approves orders before processing	Sales Manager
8	Order → Sale Conversion	One-click convert approved order to Sales Invoice; stock deducted	Sales Manager / Finance
9	Sales Invoice & Billing	Generate invoice with discount/tax; PDF download; E-Invoice/E-Way Bill (stub)	Finance
10	Payment Collection	Record Cash/UPI/Bank payment; generate UPI payment link (stub)	Finance
11	Communication	Send invoice via WhatsApp, payment link, payment reminder (stub)	Finance / Sales Manager
12	Load Sheet Creation	Select multiple invoices; assign Route, Vehicle, Driver, Delivery Person	Warehouse / Super Admin
13	Delivery Execution	Record Delivered Qty, Short Qty, Returned Qty per line item	Driver / Delivery Person

Step	Stage	What Happens	Performed By
14	Settlement	Single-screen: Cash collected + UPI + Outstanding per customer	Finance / Delivery Person
15	Reports & Dashboard	Sales, Stock, Payments, Outstanding, Delivery analytics	Owner / Management

Visual Flow (Top → Bottom)

Step 14: SETTLEMENT (Cash/UPI/Outstanding)

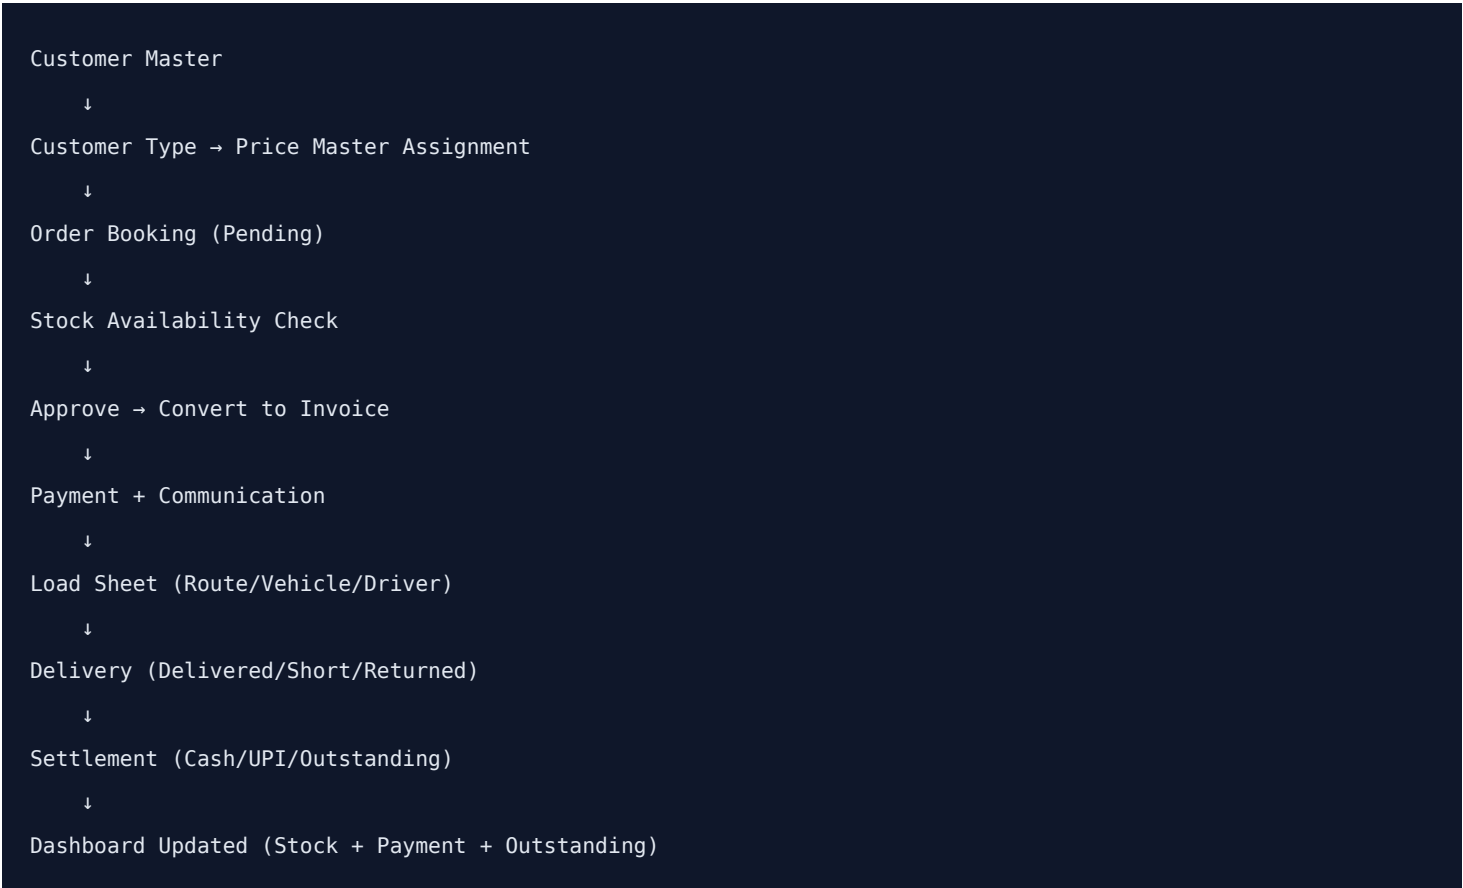

Step 15: DASHBOARD & REPORTS

3. Entity Relationship Map

How data entities connect to each other in the system (no overlap — each module owns its data).

Entity	Connected To	Module
Customer Type	Customer, Price Master	01 Master
Customer	Area, Route, Salesperson, Orders, Invoices	01 Master
Product + UOM	Price Master, Stock Level, Order Items	01 Master / 03 Inventory
Price Master	Customer Type + Product + UOM → Rate	01 Master
Purchase	Purchase Items → Stock Movement → Stock Level	03 Inventory
Order	Order Items → (convert) → Invoice	02 Order
Invoice	Invoice Items, Payments, Load Sheet, E-Invoice	04 Sales
Payment	Invoice, Outstanding Ledger, Reconciliation	05 Payments
Load Sheet	Invoices, Route, Vehicle, Driver, Delivery Person	07 Logistics
Delivery	Delivery Items (Loaded/Delivered/Short/Returned)	08 Delivery
Settlement	Load Sheet, Cash/UPI/Outstanding per Customer	09 Settlement

4. Detailed Step-by-Step Workflow

STEP 1 Master Setup — Foundation Data

Super Admin

Menu → Masters

Actions:

- Go to Masters section in sidebar
- Create Customer Types: Retailer, Wholesaler, Company, Bulk
- Create Areas and Routes for geographic coverage
- Define UOMs: Box, Piece, Case, Kg, Litre
- Add Products with SKU and base UOM
- Add Vehicles, Drivers, and Delivery Persons

Entities updated:

Customer Type

Area

Route

UOM

Product

Vehicle

Driver

Delivery Person

STEP 2 Customer & Price Master

Super Admin / Sales Manager

Masters → Customers / Price Master

Actions:

- Create Customer with Type, Area, Route, assigned Salesperson
- Set Price Master: rate per Customer Type + Product + UOM
- Bulk rates supported with minimum quantity threshold
- System auto-selects price during order booking

Entities updated:

Customer

Price Master

STEP 3 Purchase & Stock In

Warehouse

Inventory → Purchases

Actions:

- Click New Purchase
- Enter supplier, date, products, quantities and UOM
- Post purchase — stock levels increase automatically
- Stock movement log records the transaction

Entities updated:

Purchase

Purchase Item

Stock Level

Stock Movement

STEP 4 Stock Availability Check

Warehouse / Salesperson

Inventory → Stock

Actions:

- View current stock by Product and UOM
- Low-stock items highlighted on Dashboard
- Orders validate stock before conversion to invoice

Entities updated:

Stock Level

STEP 5 Order Booking

Salesperson

Orders → Create Order

Actions:

- Select Customer (price auto-loaded by customer type)
- Add line items: Product, UOM, Quantity
- System calculates line total and grand total
- Save as Pending Order

Entities updated:

Order

Order Item

STEP 6 Pending Orders Review

Sales Manager

Orders → All Orders

Actions:

- Filter by: Customer, Salesperson, Date, Area, Status
- Review multiple orders on one screen
- Identify orders ready for approval

Entities updated: Order (status: pending)

STEP 7 Order Approval

Sales Manager

Orders → View Order → Approve

Actions:

- Open pending order detail page
- Click Approve button
- Order status changes to Approved

Entities updated: Order (status: approved)

STEP 8 Convert Order to Invoice

Sales Manager / Finance

Orders → View Order → Convert to Sale

Actions:

- One-click conversion — no re-entry of products
- Invoice created with sequential invoice number
- Stock automatically deducted
- Order marked as Converted

Entities updated: Invoice Invoice Item Stock Movement

STEP 9 Invoice & Billing

Finance

Sales → Invoices / Direct Billing

Actions:

- View or create invoice directly (without order)
- Apply discount and tax
- Download PDF invoice
- Generate E-Invoice / E-Way Bill (manual stub for now)

Entities updated: Invoice E-Invoice E-Way Bill

STEP 10 Payment Collection

Finance

Payments → Collections

Actions:

- Record payment against invoice (Cash/UPI/Bank)
- Generate UPI Payment Link (stub)
- Outstanding ledger auto-updated
- Invoice status: Paid / Partial

Entities updated: Payment Payment Link Outstanding Ledger

STEP 11 Communication

Finance

Communications → Messages

Actions:

- Send Invoice on WhatsApp (stub — logs action)
- Send Payment Link to customer
- Send Payment Reminder for outstanding invoices

Entities updated: Communication Log

STEP 12 Load Sheet & Dispatch

Warehouse

Logistics → Dispatch

Actions:

- Select multiple ready invoices
- Create Load Sheet grouped by Route/Area
- Assign Vehicle, Driver, Delivery Person
- Dispatch load sheet

Entities updated: Load Sheet Load Sheet Item

STEP 13 Delivery Tracking

Driver / Delivery Person

Delivery → Deliveries

Actions:

- Open assigned delivery
- Enter Delivered Quantity per item
- Record Short Quantity (partial delivery)
- Record Returned Quantity (rejected goods)

Entities updated: Delivery Delivery Item

STEP 14 Settlement

Finance

Settlement → Cash Settlement

Actions:

- Open single-screen settlement for load sheet
- Enter Cash collected per customer
- Enter UPI/online collection
- System calculates Outstanding balance
- Complete settlement — load sheet locked

Entities updated: Settlement Settlement Line

STEP 15 Dashboard & Reports

Owner / Management

Dashboard / Reports → Analytics

Actions:

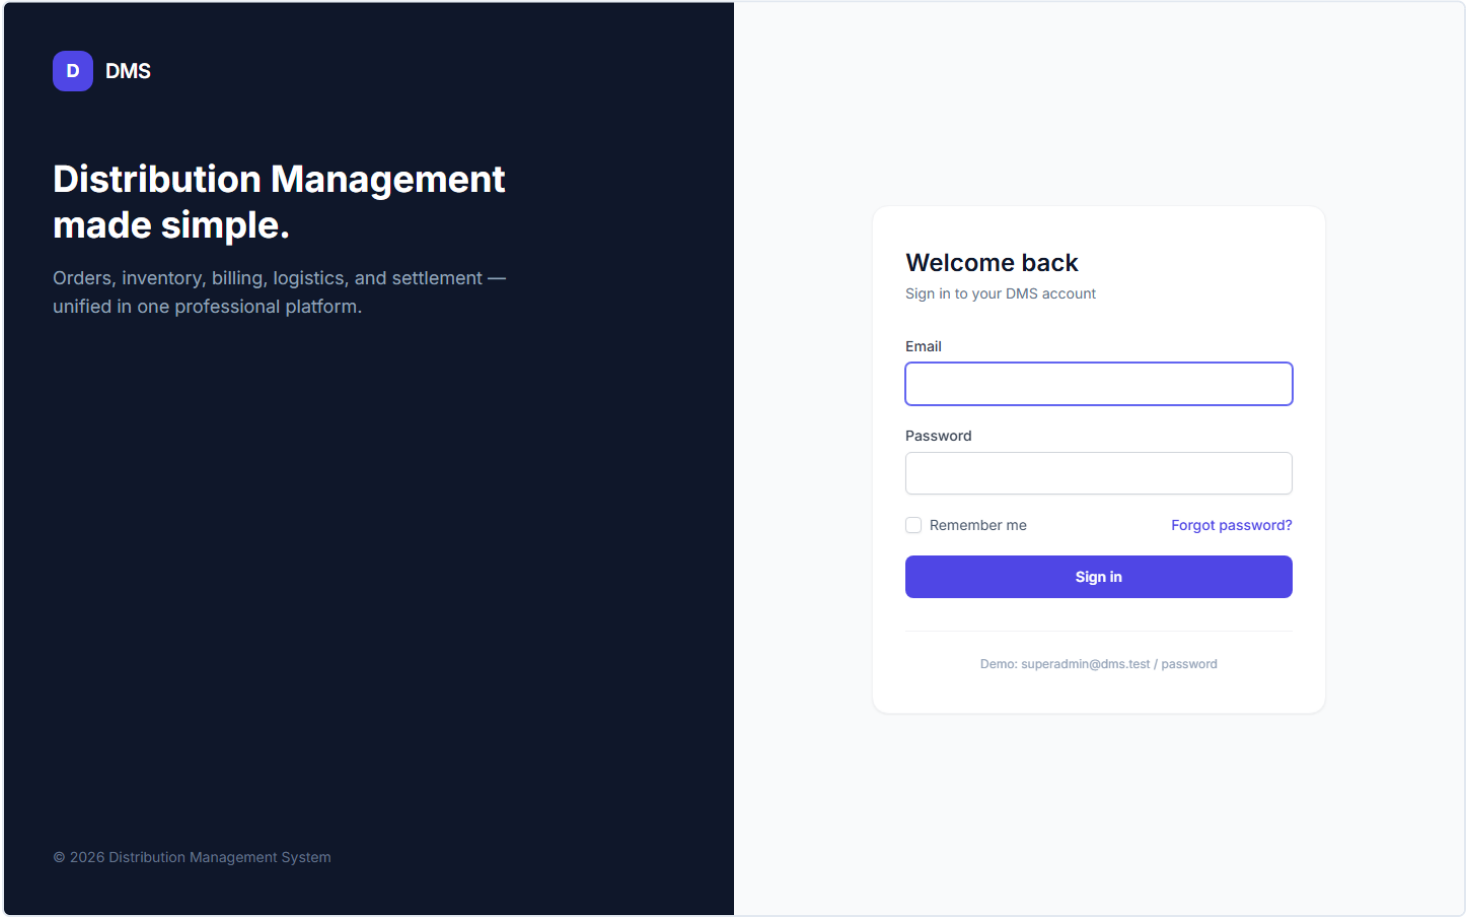

- View KPIs: Today Sales, Pending Orders, Collections, Outstanding
- Charts: 7-day sales trend, order pipeline, payment methods
- Reports: Sales, Stock, Payments, Outstanding, Delivery
- Export and filter by date range

Entities updated: Dashboard aggregates all modules

5. Dashboard & Live Screen Walkthrough
