

For a **Distribution Management Solution**, the workflow can be structured from **Customer** → **Order** → **Stock** → **Billing** → **Payment** → **Load Sheet** → **Settlement** → **Collection/Delivery**.

Distribution Management Workflow

1. Customer & Party Classification

- Create customer/party master
- Classify customers as:
 - Retailer
 - Wholesaler
 - Company
 - Bulk Customer
- Map customer type to the applicable **Price Master**

2. Order Booking

- Salesperson books order from mobile/web
- Select customer
- Select products
- Enter quantity and UOM
- System automatically applies the customer's applicable price
- Multiple UOM supported — Box, Piece, Case, Kg, Litre, etc.
- Order is saved as **Pending Order**

3. Pending Order Management

- All pending orders available on **one screen**
- Filter by:
 - Customer
 - Salesperson
 - Date
 - Area
 - Order Status

- Review and process multiple orders

4. One-Click Order → Sale Conversion

- Select approved/pending order
- **One Click → Convert Order to Sales Invoice**
- No need to re-enter products or quantities
- Stock automatically gets updated

5. Purchase & Stock Management

- Record purchase
- Purchase updates stock
- Option to **update selling rate from purchase screen**
- Maintain stock across multiple UOMs
- Real-time available stock

6. Price Management

Maintain separate price masters for:

- Retail Rate
- Wholesale Rate
- Company Rate
- Bulk Rate

Price can also be defined **UOM-wise**.

Example:

1 Box = ₹500

1 Piece = ₹55

10 Boxes = Bulk Rate ₹4,700

7. Sales Billing

- Easy sales billing screen
- Customer and product selection
- Automatic price selection based on customer type
- Apply discount/tax
- Generate invoice

From the same sales screen:

Sales Invoice → E-Invoice → E-Way Bill

8. Payment Collection

- Generate **Free UPI Payment Link**
- Share payment link with customer
- Customer makes payment
- Payment automatically reconciles with invoice
- Outstanding amount gets updated automatically

9. Invoice & Payment Communication

After invoice generation:

- Auto-share invoice on WhatsApp
- Send UPI payment link
- Automatic payment reminders for outstanding invoices
- Payment status updated automatically

10. Load Sheet Creation

Once sales orders/invoices are ready for dispatch:

- Select multiple orders/invoices
- Create **Load Sheet**
- Group deliveries by:
 - Route
 - Area
 - Vehicle
 - Driver
 - Delivery person
- View total cartons/boxes/quantity/value loaded

11. Single-Screen Load Sheet Settlement

After delivery/collection, settlement is completed from **one screen**.

Track:

- Loaded quantity
- Delivered quantity
- Short quantity
- Returned quantity
- Cash collected
- UPI/online collection
- Outstanding amount
- Delivery status
- Customer-wise settlement
